Design patterns

- Command pattern: Setting Packets before sending from Client to server
- Factory Pattern: When making new documents and setting up the baseline Document
- Builder Pattern: When designing the Panel's for the View, Also when rebuilding the Chat message's
- Iterator Pattern: When going the chat log we Iterate through many Strings from the chat
- Template Pattern: ChatView uses a Template pattern to design and place all the characteristics of a Chat
- Adapter: Client handler adapts incoming packets to specified area's for decoding an use.
